Flagship Webinar: Finger

Live & Online

Thursday 23rd June 2022

In this flagship webinar we detail how we go about digit sonographic assessment, clinical pattern recognition, along with what we look for and the techniques we use to reach the right diagnosis for the patient. Additionally, inclusion of what the surgeon wants in their reports and the management techniques that they use, make for an all-encompassing webinar of the digits.

Time	Topic
18:30-18:35	GE Welcome
